Select the installation version to download:

The screenshot shows the MobaXterm website's download page. At the top, there is a navigation bar with links: Home, Demo, Features, Download (highlighted in orange), Plugins, Help, and Contact. Social media icons for Facebook, Twitter, and Telegram are also present. On the right, there are buttons for 'Customer area' and 'Buy'. The main content area is titled 'MobaXterm Home Edition'. It lists the current version as 'MobaXterm Home Edition v24.4' with two options: 'Portable edition' (blue button) and 'Installer edition' (green button, highlighted with a red border). Below this, it provides links for previous stable versions: 'MobaXterm Portable v24.3' and 'MobaXterm Installer v24.3'. It also mentions a 'MobaXterm Preview Version' with an orange button. A note states that by downloading, users accept the 'MobaXterm terms and conditions'. A link 'here' points to third-party plugins and components sources. A footer note mentions that users can subscribe to 'MobaXterm Professional Edition' for professional support and a 'Customizer' software.

## 2.2. Install MobaXterm

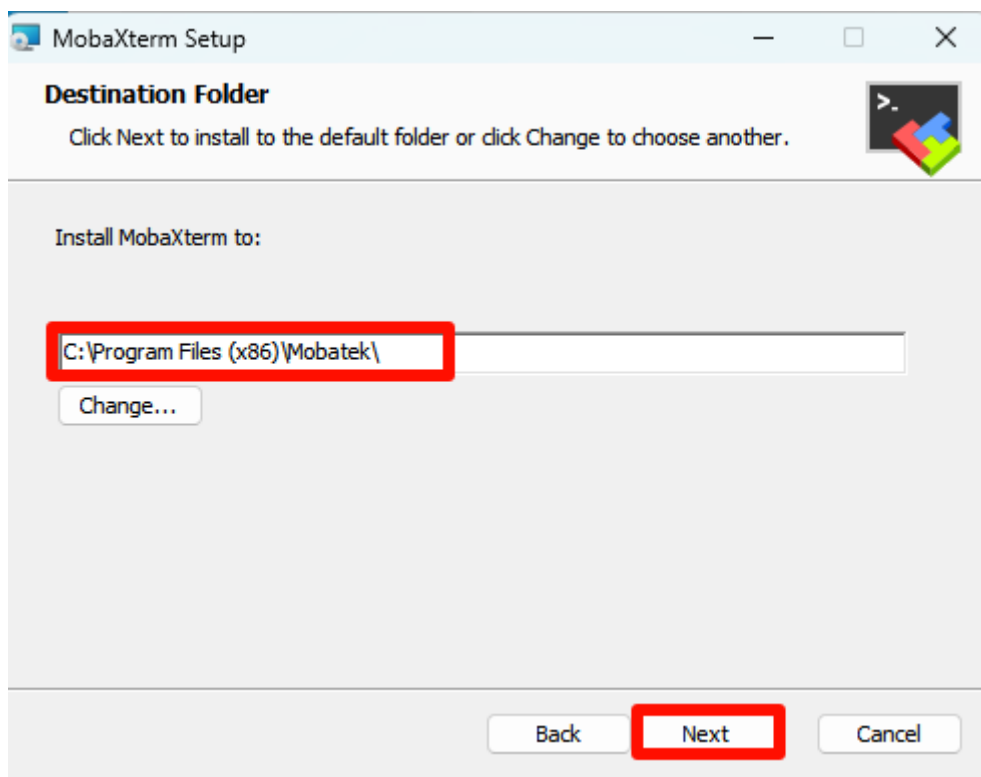

Unzip the compressed package downloaded from the official website, open the `MobaXterm_installer_24.4.msi` file to install:

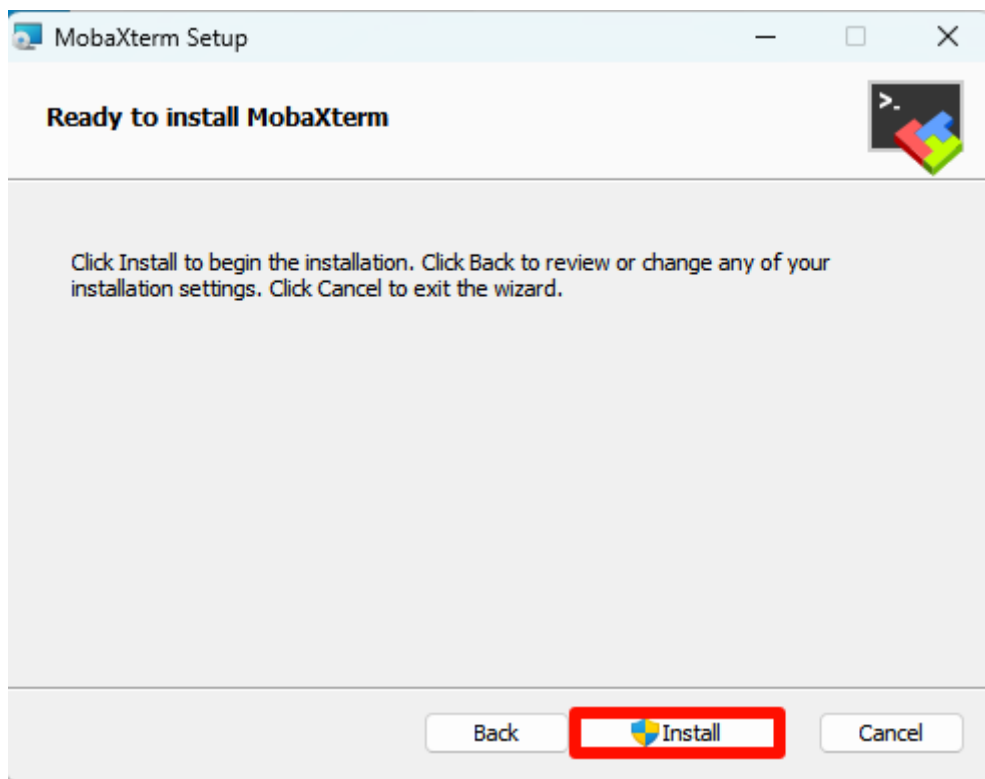

Agree to the agreement:

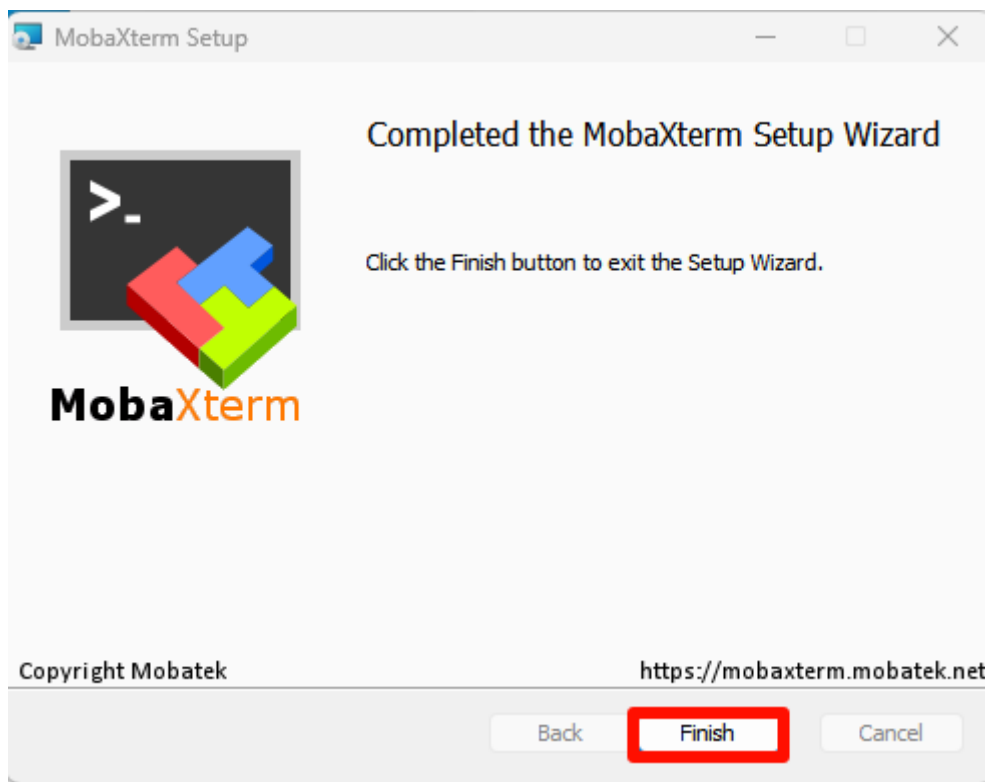

Select the software installation location: the default location is recommended

Official installation:

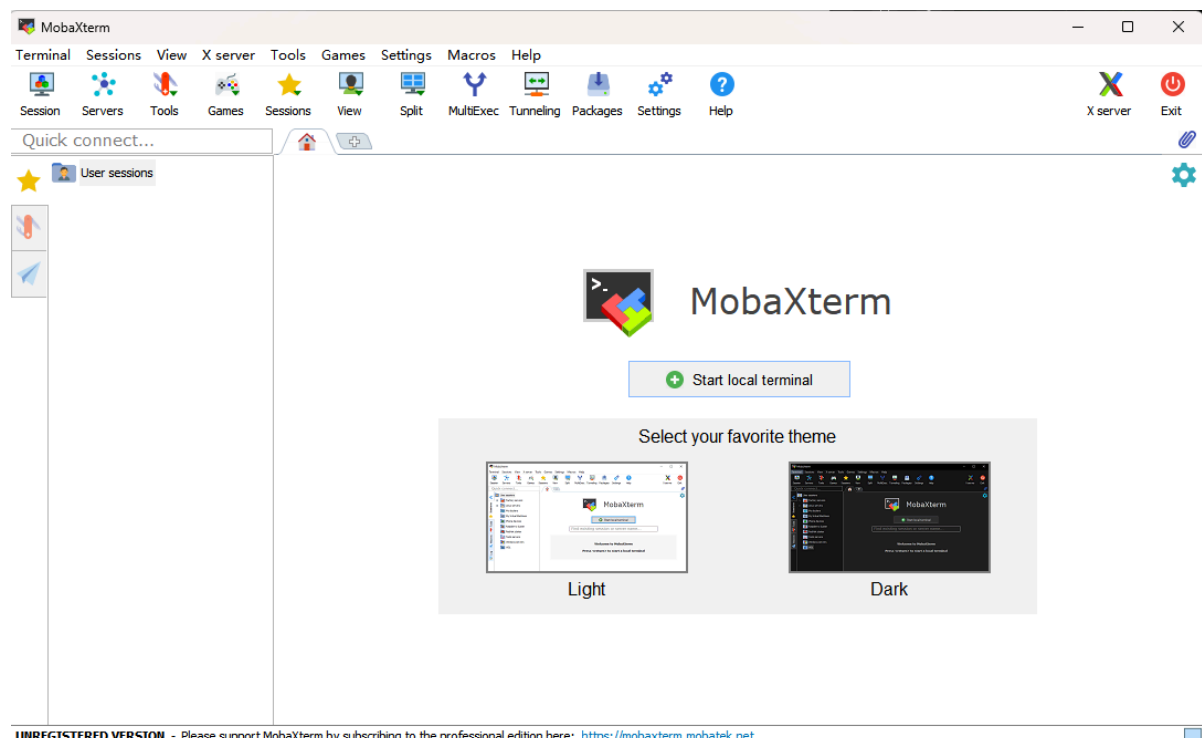

Complete installation:

### 3. Use MobaXterm

Find the **MobaXterm** icon on the desktop and open it:

### 4. MobaXterm: SSH remote

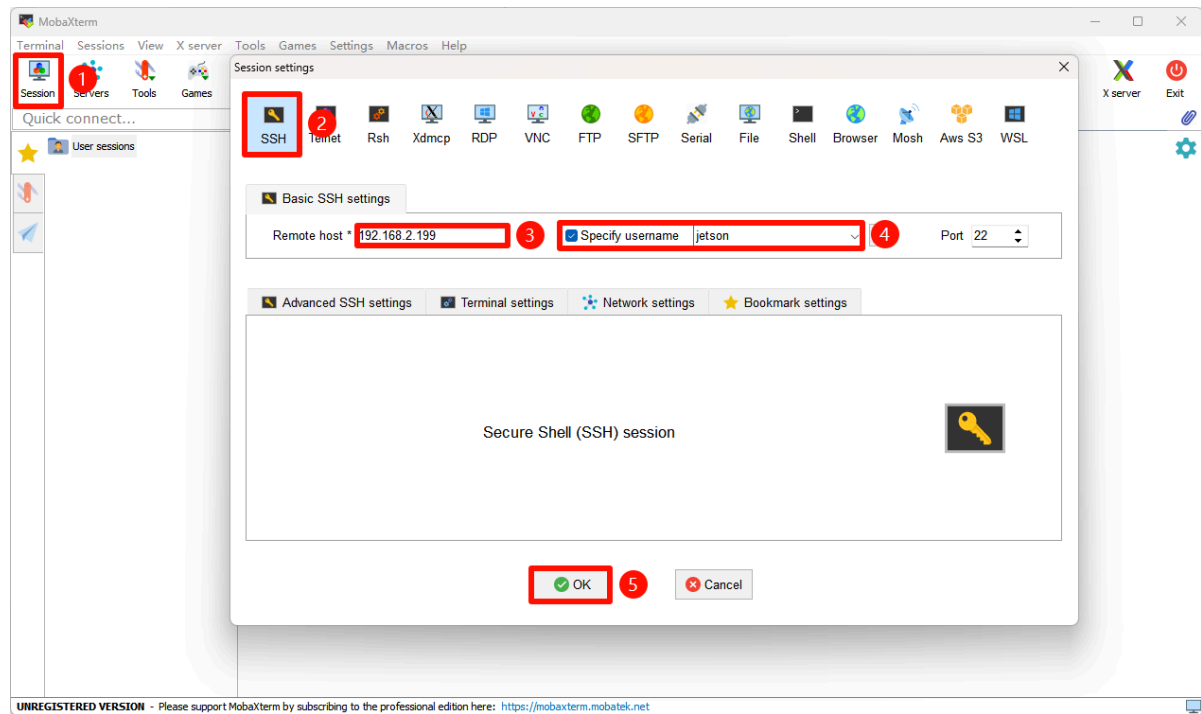

Select **Session** → **SSH** : Fill in the remote device IP and username

Default information of Jetson motherboard:

Username: jetson

Password: yahboom

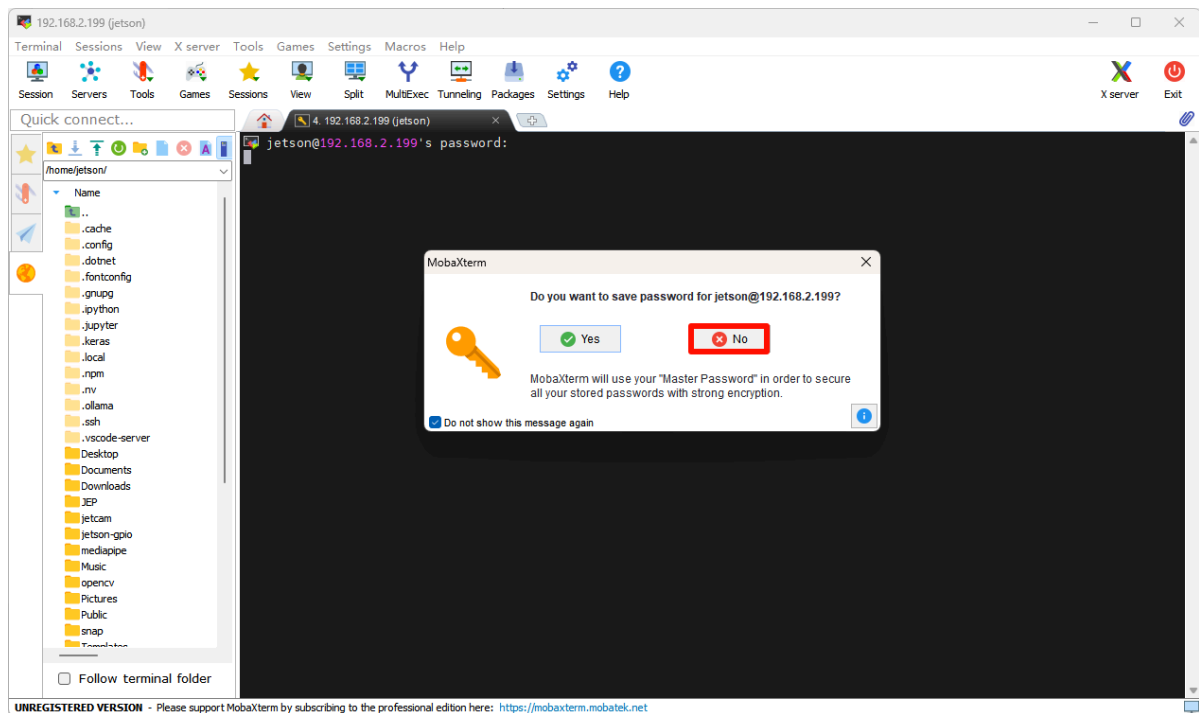

Note: When MobaXterm uses SSH remote, it will automatically use SFTP remote login in the sidebar

Enter the user password: The password session window will not be displayed. Press Enter after entering the password!

Save password: It is recommended not to save

Complete SSH remote:
