- Return to the Alibaba Cloud Model Studio homepage, refresh and click "Agree" to complete the registration of the Alibaba Cloud Model Studio Platform.

- In API References, click [Singapore](#) on the page to jump to the create API-key page

API References

Create an API key

Before you use the models or applications in Alibaba Cloud Model Studio, first activate the service and create an API key for authentication.

1. Activate the Model Studio service

Use your Alibaba Cloud account to access Model Studio ([Singapore](#) or [Beijing](#)). If an activation prompt appears at the top of the page, activate the Model Studio service to claim only [charged](#) for model calls that exceed your free quota. If no activation prompt appears, the service is already activated.

2. Create an API key

Important
This operation requires an [Alibaba Cloud account](#) or a [RAM user](#) with `administrator` or `API-Key` [page permissions](#).

After you activate Model Studio, you must manually create an API key. The system does not automatically generate one.

1. Go to the **Key Management** ([Singapore](#) or [Beijing](#)) page. On the **API-Key** tab (① in the following figure), click **Create API Key** (② in the following figure).

ID	API Key	Owner Account	Creation Time	Description	Actions
1	sk-****228*	****2	2025-05-03 16:02:10		Edit Delete

2. In the **Create API Key** dialog box, select an **Owner Account** and **Workspace**, enter a **Description**, and then click **OK**.

- Owner Account:** Select an Alibaba Cloud account or a RAM user. If an employee leaves or changes roles, you must [remove their RAM user from the workspace](#). The permissions are revoked.

- Click "Create API Key", select the account, and click "OK" to complete the creation

Key Management

API-Key

No API Key

To call models or applications, create an API key

[Create API Key](#)

- Create API Key**
Click Create API Key to create one and copy it (keep the key secured)
- Documentation**
At the top of the page, click API References to view detailed API documentation
- Get Started**
Use the API key you just created to access models or applications from Model Studio based on the documentation

2.2 Free Quota Description

When you activate Alibaba Cloud Model Studio(Singapore region) for the first time, each model will automatically receive a free quota.

You can query the remaining quota for each model and select model versions in the "Models" section. For example, for the model Qwen-Plus, click the model to view details.

Model Information

Qwen-Plus Provider: Alibaba Cloud

Overview

Qwen-Plus is an enhanced version of the Qwen ultra-large language model that supports multiple input languages such as Chinese and English. Compared to previous versions, it shows significant improvements in both Chinese and English code generation, logical reasoning, and multilingual abilities. The response style has been greatly adjusted to align with human preferences, with noticeable enhancements in the level of detail and clarity of responses. Specialized improvements have been made in creative writing, adherence to JSON formatting, and role-playing abilities.

Free quota

2% Remaining

0% 10% 50% 100%

24,098 / 1,000,000

The free quota for new users is typically valid for 30 to 90 days, starting from the date you activate Model Studio or your model request is approved. After the validity period expires or the free quota is exhausted, continued use of the model inference service will incur fees.

For more detailed instructions, please refer to [Free quota for new users](#)

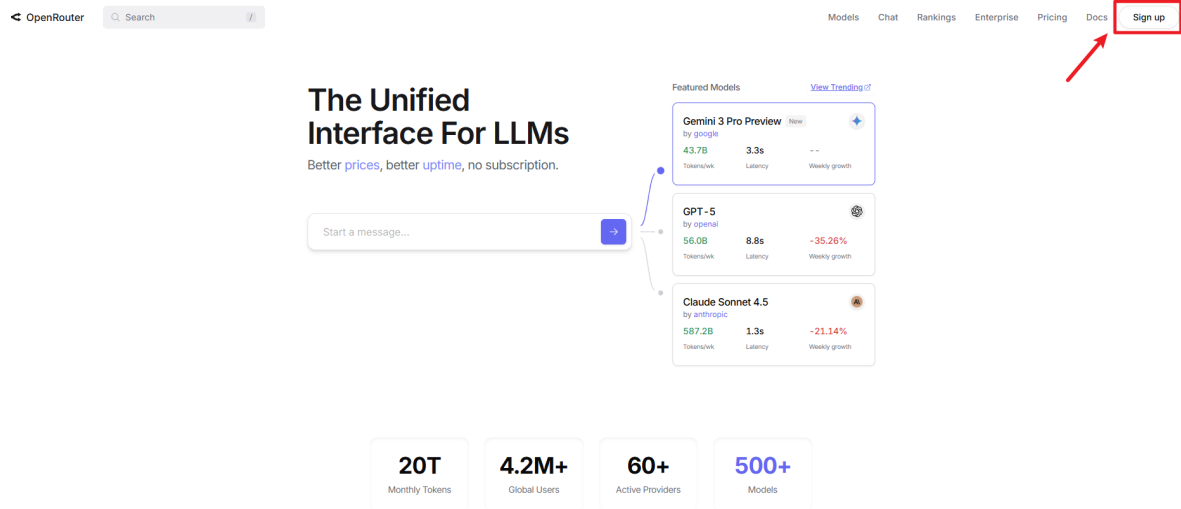

3. Openrouter Platform Account

[!NOTE]

- Openrouter offers many free model services, but there are access frequency limits and the understanding capabilities of free models vary greatly. To ensure a better user experience, it is recommended to prioritize using Alibaba's Bailian model service. This section is for reference only for users who need to use Openrouter services.

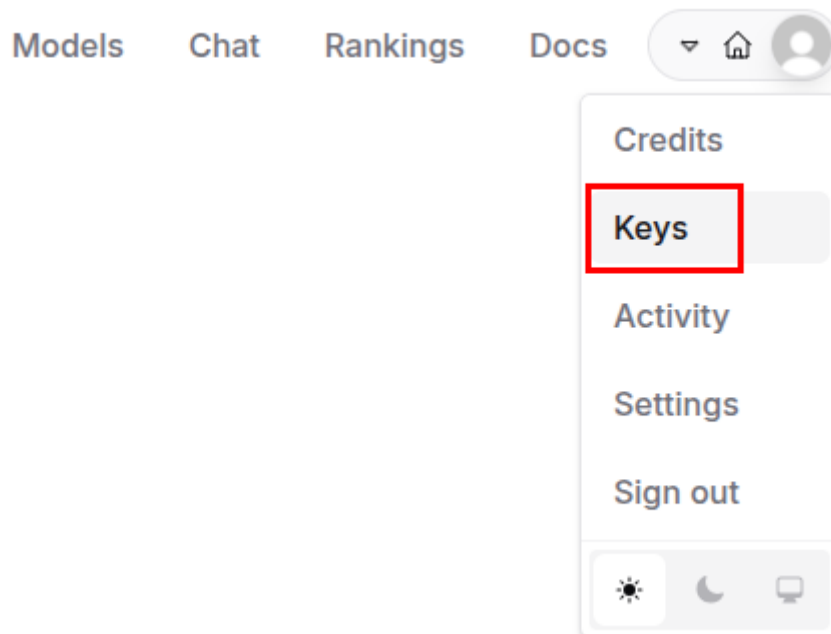

3.1 Register an Account

Open the [openrouter](https://openrouter.ai) link, click the avatar in the upper right corner to register an account. Registering an account using an email address is similar to the process described above and will not be repeated here.

3.2 Create API-KEY

- Click on Keys in the upper right corner to create an API

1 Create API Key
